Congress Venue

Lessons and dissection:

University Human Anatomy Institute of Turin
C. so Massimo d' Azeglio 52, Turin, Italy
(The course, with limited places, is addressed to: Plastic surgeons, Maxillo facial surgeons, ENT, ophthalmologist)

Places Available:

Dissection places: 40 Observer places 10
(registrations will be accepted in order of arrival and only after payment of the fee)

Registration Course entitle you to have:

Fresh-frozen specimens for dissection
Instruments for anatomical dissection
Conference Kit - Coffee break – Lunch
One night in Hotel- Social Dinner
Certificate of attendance

Under patronage of

Anatomical Dissection Course "Hands On"

AESTHETIC SURGERY OF FACIAL DISTRICT AND RHINOPLASTY

Turin, January 16th-17th 2020

Directors: Michele Pascali and Tito Marianetti
Scientific Coordinator Maurizio Catalani
Honorary President: Valerio Cervelli

All our courses on
www.aiaditalia.it

We are happy to present the first edition of this prestigious Anatomical Dissection Course about the facial district, which will take place for the first time in Turin in January 2020. There will be two intensive days of study, sharing and learning of the most complex surgical techniques, with the possibility to perform the most innovative aspects of surgery concerning facial aging, on top quality (fresh-frozen) specimens.

Lastly we look forward to meet you hoping to let you enjoy, during the little free time from the course, the beauties of Turin city. Best regards

Michele Pascali, Tito Marianetti

Thursday, January 16th 2020

08.30: Participants Registration

08.45: Course Presentation

RHINOPLASTY

- Closed technique vs "open" technique
- Approach to the anterior nasal septum
- Gibbotomy and OPN repositioning osteotomies
- Nasal tip: sutures VS grafts VS interruption techniques, when and how
- Cartilaginous septal and conchal grafts: the most frequent
- New trends: Diced cartilage and fluid cartilage

PROFILOPLASTY AND NEW TRENDS IN AESTHETIC SURGERY OF THE FACE

- Lifting of the upper lip (lip-lifting)
- Removal of Bichat Ball
- Malaroplasty with intra-oral and sub-ciliary access
- Genioplasty: intra-oral and extra-oral access

13.30 Lunch

14.30 Dissection

- Guided dissection performing fundamental surgical techniques on anatomical specimens

18.00 Closing remarks

20.30 Social Dinner

Friday, January 17th 2020

SURGERY OF THE UPPER THIRD OF THE FACE

- Anatomy of the orbital and temporal region
- Eyebrow lifting: direct and transtemporal technique
- Retaining ligaments and adipose compartments
- Superior blepharoplasty technique *step by step*
- Transconjunctival inferior blepharoplasty
- Inferior transcutaneous blepharoplasty technique *step by step*
 - Management of ROOF and orbital fat
 - orbicularis oculi muscle flap: new rejuvenation technique of the lower lid and others
- Canthopexis: an obligatory step in the inferior blepharoplasty
- Canthoplasty

SURGERY OF THE MIDDLE THIRD OF THE FACE

- Anatomy of the Midface region
 - Subperiosteal Middle-facial lifting with supero-lateral anchorage: "suspender-like technique"
 - Subperiosteal Middle-facial lifting with vertical anchorage: "belt-like technique"
- Supra-periosteal midface

SURGERY OF THE LOWER THIRD OF THE FACE

- *MINILIFTING VS FACE LIFTING*
 - SMAS dissection
 - SMASectomy
 - Dissection planes and facial nerve anatomy
 - Plication VS imbrication: comparing techniques
- Platysmaplasty and remodelling of the cervico-facial angle

13.30 Lunch

14.30 Dissection

- Guided dissection performing fundamental surgical techniques on anatomical specimens

18.00 Closing remarks and delivery of certificates.
